

Pre-School Classes

PreSchool Classes

Children need to be active every day to promote their healthy growth and development. Those who establish healthy lifestyle patterns at an early age will carry them - and their benefits - forward for the rest of their lives - and this is important to us at CSoG. There are many benefits to be gained - including the role of physical activity in helping children to be 'school ready.'

Our fully qualified, enthusiastic, and specially qualified Class Manager with the help of our Sports Leaders and UKCC Level 1, Assistant Coaches on our **CSoG** Coaching Team provide a range of fun-filled classes toddlers and pre-schoolers of all ages and provide an excellent introduction to physical activity. Our classes are highly recommended with parents telling all their friends about us and advertising to their Nursery School or Infants School

Once children are confident in the gym, we encourage you to try our structured pre-school classes (Mini Movers) which will really start to develop your little one's gymnastics skills and school-readiness skills. These classes are fully structured and lead by one of our fully qualified and experienced pre-school coaches. The classes are typically suitable for Tiny Tumblers from age 3yrs will develop your child's cooperation and listening skills – as well as their fundamental movement skills.

Our Pre-School Tiny Tumblers from the age of 3yrs are taught in an independent class. These sessions are fully structured and lead by one of our fully qualified and experienced pre-school coaches - with several helpers / young leaders on hand to provide additional support. These sessions are designed to further develop independence, cooperation and listening skills alongside gymnastics skills as little ones begin nursery or school.

Parent and Toddler classes are organised during School holidays.

Pre-School Classes Award Scheme

Children need to demonstrate their ability to undertake the following tasks as outline within the three awards.

They will receive a certificate and award badge on completing the following tasks.
